

WHAT TO DO IF:

APARTMENT LIGHT SWITCHED OFF

Apartment light can be switched off, for example for a storm or also **when both dishwasher and hairdryer are on.**

What to do:

- first check between the two bathroom's door at ground floor if all the switches are up (except for the grey one)

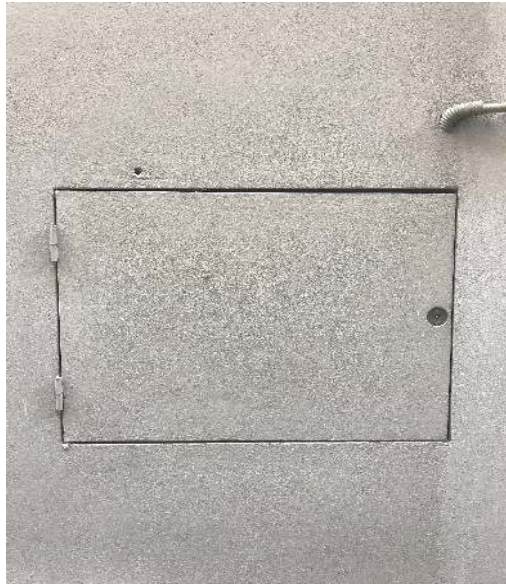

If the light is still not working:

- get the universal key (in the kitchen, hanged in the boiler shutter)

- go outside from the gate entrance, in the pedestrian street Via Sant'Abbondio

- turn left and there is a little door on the building wall (5 meters from the court gate)

- open the door with your universal key and you will find the light switch that has to be up (the one with *Casetta* written on it)
